

## **TAP Connector™ Throwing Club Use**

***Thank you for purchasing the Connector™ Throwing Club. To ensure safe use please read the product use instructions/limitations and review them with anyone who will be using the Connector™ Throwing Club.***

- The Connector™ Throwing Club is intended to be used as a throwing device into nets only; do not throw the Connector™ Throwing Club against hard surfaces or any solid surface that does not absorb the energy of the throw.
- Beware of the Connector™ Throwing Club rebounding off the target net and keep a safe distance from the net when the Connector™ Throwing Club is in use; do not allow anyone to stand beside or behind the net when it is in use as a target for the Connector™ Throwing Club.
- The Connector™ Throwing Club is a painted, wooden object and will show signs of wear with use. Like a wooden bat, The Connector™ Throwing Club can be damaged or broken with use; inspect the Connector Throwing Club before every use and discard if there are any signs of structural damage that affects the integrity of the Throwing Club.
- The Connector™ Throwing Club has a painted surface and can become slippery when used. It is recommended the same precautions be taken with The Connector™ Throwing Club as would be taken with a standard wooden bat, such as taping the handle or using a bat grip. VukGripz Bat Grip is a recommended accessory for use with the Throwing Club.
- The Connector™ Throwing Club should be stored in dry environments and away from sunlight and extreme temperatures.

The Connector™ Throwing Club is made of solid wood and is designed to be thrown into a net, with intent, at a designated target area. Any net and target selected for use should be capable of withstanding continued intense impact and regularly inspected to insure suitability for use. It should never be thrown against a hard surface as damage to the Connector™ Throwing Club and the surface may occur. The Throwing Club should never be thrown in the direction of another athlete or onlooker.

The Connector™ Throwing Club is recommended to be used in blending drills with a regulation baseball; the athlete should not make more than five consecutive throws with the Connector™ Throwing Club without making at least one throw with a regulation baseball. The Connector™ Throwing Club is excellent to use as precursor to, or in addition to, The Baseball Training Sock™. The Connection Ball™ is also an ideal companion tool to use with the Connector™ Throwing Club in blending drills with a baseball.

The Connector™ Throwing Club is warranted for 30 days from purchase. Oates Specialties will provide a one-time replacement for product failure resulting from a material or manufacture defect. The Connector™ Throwing Club is not warranted for damage resulting from misuse, abuse, normal wear and tear or cosmetic damage. **BEFORE USING THE CONNECTOR™ THROWING CLUB PLEASE READ THIS WARRANTY CAREFULLY. IF YOU DO NOT AGREE TO THE TERMS OF THIS WARRANTY, DO NOT USE THE CONNECTOR™ THROWING CLUB AND RETURN TO OATES SPECIALTIES LLC FOR REFUND OF PURCHASE PRICE.**
